

What does an inode look like?

It's just me ☹️

- lots of people: we still need permissions!
- people are dumb
 - ↳ prevent them from deleting OS files
- programs from Pirate Bay shouldn't be able to read my data

Deletion Time

- Consensus → uncertain
- delete a file → Recycle bin safety net
- secure wipe on a schedule
 - ↳ 0 bits on a schedule
- recovery operations (FBI, CIA, CSIS)

- security reasons (131, 114, 113)

Last access time (atime)

- security related reasons

Auditing → who and when accessed
secure files?

- caching.
